Index of articles 1960–85

This subject index covers all articles in the first 99 issues of the *Quarterly Bulletin* (ie up to June 1985). It also includes the main subjects of speeches by the Governors, Directors and Officials, together with notices and notes, including feature 'boxes' in special articles and in the various regular commentary articles: it does not include the subject matter of the commentary articles themselves, nor does it cover the statistical annex.

Entries are referenced by a code generally in the form yy–ppp where yy represents the last two digits of the year of the issue and ppp the page number within that volume. In the first five issues, covering 1960 and 1961, pages are numbered from 1 in each issue; for 1961 the first part of the reference code has three digits, the third being the number of the issue within that year. Thus, **613**–24 refers to page 24 of the September 1961 issue. Speeches are indicated by a letter in parenthesis after the reference; the annual Mansion House speeches are denoted by (M), the Overseas Bankers Club speeches by (O) and other speeches by (S).
